Philips GoGear	•		•	•	•		•	•		•	•						•			•		

Many players on the market are designed primarily for use with music. Functions important for eaudiobooks include:

- 1) Support of WMP/DRM encrypted files - all recommended players meet this criterion
- 2) Adequate memory - 256MB will hold one eight-hour book, 512MB will hold two books, 1G will hold four books, etc.
- 3) Bookmarking or "Off/On" - "Off/On" defined as shutting player off without stopping/pausing, then restarting player to return to same place in file
- 4) Full time display/Forward and Reverse - other aids to navigability

The following players have been tested and are not recommended for eaudiobooks:  
 Sony Walkman, Philips Jukebox, RCA Lyra, Lexar LDP, MPIO, Gateway Jukebox
