

National Grid MassSAVE Free Home Energy Assessment Program

Requirements:

- 1) you must be a homeowner
- 2) you must heat with natural gas

As a gas-heating homeowner, you are eligible for a FREE Home Energy Assessment through National Grid's MassSAVE program. Upon your request, a MassSAVE Energy Advisor will spend no more than 2 hours doing a minimally invasive, primarily visual inspection of the typically leaky areas of your house, including your attic and basement. The Energy Advisor may also poke a small hole in your furnace to check its efficiency; it will then be patched appropriately. Depending on the outcome of this "screening" visit, you may be eligible for free air sealing and up to 75% or \$2,000 of insulation.

Please call **1-800-632-8300** to schedule your MassSAVE home energy assessment. As a National Grid customer, press 1 at the prompt. Call center hours are 8AM to 8:30PM Monday through Thursday, Fridays 8AM to 5PM, and Saturdays 8AM to 3PM; except for holiday weekends.

By calling MassSAVE, you will be taking a step to join fellow members of the Concord community who are also seeking to reduce the impact of energy use on our environment and pocketbooks by embracing energy efficiency.

Thank you!
